

Senior Design & Drafting Technologist

Steenhof Building Services Group

Full Time Position – Orillia, ON

At Steenhof Building Services Group, we pride ourselves on being a fun and energetic engineering firm with offices located in prime cottage country. Our main office is in Orillia, where outdoor activities are at your footsteps: from snowmobiling and skiing to hiking and boating, the options are endless. Steenhof Orillia is an hour away from downtown Toronto for nightlife and urban experiences.

We are only interested in **Senior Design & Drafting Technologists** with appropriate qualifications that are on a fast track career, desire to work in a great innovative firm and are interested in a challenging and rewarding environment.

Responsibilities:

- Prepare and interpret conventional and AutoCAD engineering designs, drawings and specifications for residential and commercial construction
- Lead the technical team and exercise complex directives for detailed design/drawing criteria for all project types and disciplines
- Provide lead expertise in tendering processes, construction management, budget control and design
- Plan, organize and control the production of working drawings at all stages of construction to meet key target dates and maintain project schedule/deliverables
- Establish and implement changes to increase efficiency, productivity, and overall profitability in the workplace

Requirements:

- Diploma or degree from a 2+ year Architectural or Civil Engineering Technology program
- Minimum 7 years of full time architectural and/or engineering workplace experience or a combination of education/work relevant experience
- Construction experience and professional accreditation (AATO or OACETT)
- Proficient in Autodesk, Revit, AutoCAD and Microsoft Office
- Advanced understanding of the Ontario Building Code
- BCIN certification (General Legal, House, Small Buildings, etc.)
- Exceptional organization, time management, verbal and written communication skills
- Experience in all areas of the construction industry. Able coordinate and understand the interaction between all disciplines (Planning, Design, Structural, Mechanical, Electrical, Construction, Construction Management, etc.)
- Strong leadership skills, able to direct staff with varying levels of experience in all discipline

Annual Salary:

- \$80,000 +
